Equalities Implications:

There are no direct equalities impacts arising from this report.

Climate Change Impact Assessment and Mitigation Measures:

1. *No direct impacts arising from this report.*

Risk Management:

None

Legal Considerations:

None

Financial Consequences – Revenue:

None

Financial Consequences – Capital:

None

Number of attachments to the report: 1

Comments/recommendations from Overview & Scrutiny Committee

None

BACKGROUND PAPERS:

The author of the report must include list of those documents on the subject matter which:

- Disclose any facts or matter on which the report or an important part of the report is based;
- Which have been relied on to a material extent in preparing the report

TRACKING/PROCESS		[All sections to be completed]
Does this report relate to a major strategic decision, as set out in the GMCA Constitution		No
EXEMPTION FROM CALL IN		
Are there any aspects in this report which means it should be considered to be exempt from call in by the relevant Scrutiny Committee on the grounds of urgency?		Please state the reason the report is exempt from call-in
GM Transport Committee	Overview & Scrutiny Committee	

1. BACKGROUND

1.1 The Economic Resilience Dashboard aims to provide up to date intelligence on the conditions in the Greater Manchester economy following the outbreak of Covid-19.

The data is divided into four sections:

- Current Economic Conditions provides leading indicators on the economy and labour market
- Business and Consumer Confidence provides measures of confidence in the economy as illustrated in retail spending and responses to national surveys
- Greater Manchester Business Indicators provides data gathered by GM based organisations on business sentiment and confidence.
- Behavioural Insights provides information on the movement of people across GM

1.2 The available economic data in response to Covid-19 is changing rapidly with frequent new datasets becoming available and others being withdrawn. The dashboard will be updated with the best available data each month.

1.3 The latest version of the dashboard can be viewed live at this link (and is attached at a PDF report):

2. HEADLINE MESSAGES:

2.1 The claimant count for October 2020 shows that after rapid increases in the number of residents seeking unemployment related benefits between April and May 2020, the total number of claimants in Greater Manchester (GM) stabilised in June and has remained steady since then. 140,335 GM residents claimed unemployment related benefits in October, a slight decrease of 2% on the previous month and an 88% growth in the claimant count since March. This is less than the 105% growth in claimants across the UK as a whole.

2.2 According to the Growth Company's fortnightly business survey, the number of GM firms planning to make redundancies was 2.3% in the 8 weeks to 9th November. The number of firms that have already made redundancies was 10.1% for the same period.

2.2 Total online job postings in GM fell slightly to 5,142 in the week ending the 14th November 2020. In the first week of March, there were around 7,500 postings a week: in other words, vacancies have fallen by around 25%. Vacancies recovered to their pre-crisis levels during the week ending 3rd October but have declined since then. However, vacancies appear to have hit a low in early May 2020 and have made a modest recovery since then.

- 2.3 There were 131,600 employees on furlough in Greater Manchester on 31st August. This represents 10% of the total number of eligible employments. This compares to 11% for the UK as a whole. Around 86,000 GM residents had claimed a second self-employment income support (SEISS) grant by 30th September, equivalent to a 71% of those eligible for the scheme. This compares to a 67% take up across the UK as a whole.
- 2.4 Footfall data for the Manchester Local Authority area has shown that following a recovery to pre-crisis levels in week commencing 27th September, footfall has fallen to -23.7% in week beginning 9th November. Data from TfGM also shows that following a recovery in mid-September overall passenger journeys across all modes are -24% down since week beginning 9th March.
- 2.5 Broader measures of business and consumer sentiment show some mixed signs for the GM economy. All three sectoral Purchasing Manager's Indices are now above the 50.0 threshold score that indicates growth, however all three sector PMI's decreased in October. Underlying consumer confidence has consistently remained below its pre-crisis level, currently standing at -31, 24 points below its February 2020 score which suggests that there is still considerable uncertainty about the future. Despite this, retail sales have recovered to above their pre-crisis level, largely driven by online shopping.

3. RECOMMENDATION

- 3.1 The GMCA is requested to note and comment on the latest update of the Greater Manchester Economic Resilience Dashboard
