Reasons for Special Urgency : Explain why it cannot be published in the Register of Key Decision, with less than 5 clear days notice.	The decision was published on the Register of Key Decisions on 13 April 2022 but on Friday 6 May will not have been on the register for 28 days. The 25 th March GMCA report Greater Manchester Electric Vehicle Charging Tariff Part A Report Template (greatermanchester-ca.gov.uk) set out the delegation to allow TfGM to be able to quickly respond to wholesale energy prices and to determine an appropriate electric vehicle charging tariff. A report is being prepared for a decision in early May.	
Is exemption from call-in for scrutiny needed?	No	

<p>Explain how any delay will seriously prejudice the legal or financial position of the GMCA</p>	<p>The current EVCI tariffs were set on the basis of electricity costs of 14 p/kWh. Since January 2021, the wholesale cost of electricity has risen dramatically. As set out in the EV Tariff Report on 25 March 2022 there is a need to review and revise the EV tariff once the EV electricity costs are fixed.</p> <p>A report is being prepared for a decision in early May. The current financial impact of these increases in electricity cost, without a corresponding increase in tariff, has resulted in TfGM incurring net costs of c£8,000 per month, compared to a surplus of c£9,000 per month when the cost was 14 p/kWh.</p> <p>Without a general exemption the decision cannot be made until Thursday 26 May.</p>
