## Greater Manchester Transport Committee – Work Programme

## March 2023

The table below suggests the Committee's work programme for March 2023-March 2024. Members are invited to further develop, review and agree topics which they would like to consider. The work programme will be reviewed and updated regularly to ensure that the Committee's work remains current.

The key functions of the Committee are -

- Accountability: active and regular monitoring of the performance of the
  transport network, including the Key Route Network, the operation of the GM
  Road Activities Permit Scheme, road safety activities, etc as well as all public
  transport modes. This role will include holding service operators, TfGM,
  highway authorities and transport infrastructure providers to public account,
  and to recommend appropriate action as appropriate;
- Implementation: oversee the delivery of agreed Local Transport Plan
  commitments. This includes the active oversight of the transport capital
  programme, and decisions over supported bus services network to be made
  within the context of policy and budgets set by the Mayor and the GMCA as
  appropriate; and
- Policy Development: undertake policy development on specific issues, as may be directed by the Mayor and / or the GMCA.
