|   |  |  |
| Subject:  |  |  |
| GM Clean Air Plan Evidence Submission – October 2024                  |  |  |
| Reason for urgent decision:   |  |  |
| n/a   |  |  |

### Type of Decision: Non-Mayoral

#### 2. Details of the Decision:

#### The decision is that:

The Group Chief Executive, GMCA, GMFRS & TfGM, in consultation with the Greater Manchester Clean Air Lead, has approved the final submission of material to support the case for an investment-led, non-charging Greater Manchester Clean Air Plan to the Government's Joint Air Quality Unit.

### The reasons for the decisions are:

The Air Quality Administration Committee considered and agreed a report on 1 October 2024, which provided an update on the Case for a new Greater Manchester Clean Air Plan. It confirms that in response to changing circumstances and opportunities an updated appraisal of Greater Manchester's proposed investment-led plan has been undertaken against a benchmark charging Clean Air Zone (CAZ) in the centre of Manchester and Salford.

It is for the Government to determine what measures Greater Manchester is to implement. The appraisal shows that only the investment-led plan complies with the requirement placed on the 10 Greater Manchester Authorities to deliver compliance in the shortest possible time and by 2026 at the latest.

The Committee agreed a delegation was made to the Group Chief Executive, GMCA, GMFRS & TfGM, in consultation with the GM Clean Air Lead, to approve the final submission of material to the Government's Joint Air Quality Unit and deal with any supplementary requests from the Unit in support of the appraisal.

Alternative options considered and rejected when making the decision: None

|--------|------------|----------|-----------|----------|
| BURY   | OLDHAM     | SALFORD  | TAMESIDE  | WIGAN    |

## List Non-confidential reports

The reports will be published at <u>Technical Documents New | Clean Air Greater Manchester</u> (cleanairgm.com) - Evidence Submission for a new Greater Manchester Clean Air Plan.

| (cicanangin.com) Evidence   | Submission for a new Greater Manchester Clean Air Plan.  |
|---|--|
| Name  | Description  |
| Appraisal Report  | Appraisal of GM's investment-led, non-charging Clean Air<br>Plan (Investment-led Plan) against a benchmark charging<br>Clean Air Zone (CAZ Benchmark) in the centre of Manchester<br>and bordering areas of Salford (the Regional Centre). This<br>includes an overview of the current air quality baseline, and<br>a description and appraisal of the Investment-led Plan and<br>CAZ Benchmark, including the costs, timescales to<br>implement and associated risks. |
| Supplementary Appraisal<br>Report   | Considers the implications to the date of compliance<br>associated with issues identified after the completion of<br>modelling in summer 2024. Provides a comparative appraisal<br>of the Investment-led Plan and the CAZ Benchmark taking<br>these matters into account.  |
| T1: Local Plan Transport<br>Modelling Tracking Table  | Sets out feedback received from the government's Joint Air<br>Quality Unit on the traffic and transport modelling process<br>and provides GM's responses to that feedback.   |
| T2: Local Plan Transport<br>Model Validation Report   | Describes the development of the base year transport model<br>for use in the GM Clean Air Plan assessment. The report<br>describes the main features of the transport model and<br>presents details of the base year model validation, including<br>comparisons of modelled and observed traffic flows and<br>journey times.   |
| T3: Local Plan Transport<br>Modelling Methodology<br>Report   | Describes the approach taken to forecast road traffic for the GM Clean Air Plan. The report describes the development of the future year highway networks and trip matrices and sets out the assumptions on which the forecasts are made.  |
| T3 Appendix A: Technical<br>Note 43 - Demand<br>Response Modelling of<br>Impacts of Recent and<br>Planned Changes to the<br>Regional Centre | Technical note setting out details of the City Centre<br>Transport Strategy (CCTS). The note also provides details of<br>the demand modelling undertaken to assess the demand<br>impacts of CCTS within the regional centre, which form part<br>of the 'Do Minimum' modelling. The note also provides<br>historic background trends in traffic volumes accessing the<br>Regional Centre.   |
| T3 Appendix B: Technical<br>Note 42 - Modelling the<br>Impacts of the Increased<br>Uptake of Electric Cars                                  | Technical note introducing recent guidance updates in relation to electric vehicle future car projections and implications on the 'Do Minimum' modelling.  |
| T4: Local Plan Transport<br>Model Forecasting Report  | Describes the transport modelling process for the GM Clean<br>Air Plan and presents baseline and forecasts for the<br>Investment-led Plan and CAZ Benchmark. The report<br>includes appendices setting out the vehicle population<br>estimates and CAZ Benchmark assumptions.  |

| T4 Appendix A: Technical          | Sets out the updates to the Cost Response Models and             |
|-----------------------------------|--|
| Note 49 – CAZ Benchmark           | behavioural responses forecast for the CAZ Benchmark,            |
| Modelling Assumptions             | which are compared to CAZ response forecasts developed by        |
|                                   | other local authorities.   |
| T4 Appendix B: Technical          | Sets out the summary of the key vehicle volumetric               |
| Note 37 - Vehicle                 | information used for the GM Clean Air Plan.                      |
| Population Estimates              |  |
| AQ1: Local Plan Air Quality       | Sets out feedback received from the government's Joint Air       |
| Modelling Tracking Table          | Quality Unit on the air quality modelling process and            |
|                                   | provides GM's responses to that feedback.                        |
| AQ2: Local Plan Air Quality       | Sets out the methodology that is used to underpin the air        |
| Modelling Methodology             | quality modelling for the baseline (2016) and 'Do Minimum'       |
| Report                            | (2021, 2025 & 2026) scenarios developed for the                  |
|                                   | Investment-led Plan and CAZ Benchmark appraisals.                |
| AQ3: Local Plan Air Quality       | Provides the results of the air quality modelling for the        |
| Modelling Report                  | Investment-led Plan and CAZ Benchmark appraisals, the            |
|                                   | main assumptions on which the forecasts are based, the           |
|                                   | verification process and consideration of the 2023               |
|                                   | monitoring data.   |
| Sensitivity Testing Report        | Sets out the results of sensitivity testing carried out on the   |
| Sensitivity resting Report        | modelling and draws conclusions on the implications for the      |
|                                   | GM Clean Air Plan.   |
| Applytical Assurance              | Considers the limitations, uncertainties and risks in the        |
| Analytical Assurance<br>Statement | evidence base, and the implications of these for decision        |
| Statement                         | makers. It considers whether an appropriate procedure has        |
|                                   |  |
|                                   | been followed, in terms of the modelling process and the         |
|                                   | source data, and whether appropriate checks have been            |
|                                   | carried out. It considers whether appropriate expertise has      |
|                                   | been utilised, and whether sufficient time and resources         |
|                                   | have been allocated to the analysis. The report describes the    |
|                                   | updates that have been made to the evidence base where           |
|                                   | appropriate, and the extent to which there have been             |
|                                   | changes regarding limitations, uncertainties and risks in the    |
|                                   | analysis.  |
| Hackney Carriage and              | Background information on the GM hackney carriage and            |
| Private Hire Vehicle              | private hire vehicle fleet used as the evidence base for the     |
| Evidence Note                     | development of the Clean Taxi Fund as part of the                |
|                                   | Investment-led Plan. This note includes taxi statistics, vehicle |
|                                   | pricing and availability information, taxi personas and a        |
|                                   | summary of relevant engagement and research feedback.            |
|                                   | This note was previously Appendix 1 of the Appraisal Report      |
|                                   | in the December 2023 submission. The note provides an            |
|                                   | updated position to 'Technical Note 19: GM CAP Taxi and          |
|                                   | PHV Fleet Research', issued in 2019 which provided a pre-        |
|                                   | Covid-19 view of the market and supporting evidence.             |

| Clean Taxi Fund - Eligibility | Outline of the proposed GM Clean Taxi Fund eligibility       | Ι |
|-------------------------------|--|---|
| Criteria & Funding            | criteria and administration of funding under the Investment- |   |
| Administration                | led Plan. This note was previously Appendix 2 of the         |   |
|                               | Appraisal Report in the December 2023 submission.            |   |
