Art Battle MCR

GRIT Studios CIC

---

A dimly lit gallery space with a crowd of people gathered around an artist painting on an easel. The scene is captured in a low-key, cinematic style, with the primary light source coming from the background, creating a dramatic atmosphere. The artist is positioned in the center, surrounded by onlookers. The architecture features large, classical-style columns and a high ceiling with visible pipes and lighting fixtures. The overall mood is one of artistic engagement and community.
